Personal Data

Born April 16th 1978 in Kruševac, Serbia. Not married.

Professional Experience

2001 - Pexim, N. Belgrade (Yu)

Development of a multi-channel **e-banking information system** that provides banks and their clients with a reliable and secure way to manage their bank accounts. The system enables information exchange with end-users through all available channels (WWW, e-mail, fax, SMS, WAP, IVR, Windows app) with XML and SOAP as underlying information carriers.

I participated in this large project by developing a flexible and expandable **billing subsystem**, which analyzes log tables and bills each processed e-banking operation according to a plugin-style provided pricing model and user profile and generates XML and/or HTML output ready for preview, printing and sending to a client. I also took part in **web channel development**.

Within the project I worked in C# on Microsoft .NET developing platform, MS SQL Server and XML, XSLT and SOAP technologies.

2001 - Inopsys, Budapest (Hu)

I worked in a two-member team that developed a commercial database-backed multi-lingual **web mail application**. The application enabled work with multiple mail accounts, multiple mail folders, POP3 mail collection from external servers, HTML mail composing and browsing with attachment support, and contacts management. It also had administration interface for user management.

During the project, I went through working with HTTP, MIME, POP3 and SMTP protocols, and building of bi-directional web interface (the application supported Hebrew interface too).

The project was developed for Linux platform and used PHP and MySQL on the server, DHTML and JScript on the client side, and some external applications written in C and Perl.

2000 - Freelance Web Projects

Developed or took part in development of **several smaller database-backed web sites** (PHP, MySQL):

- Pay-per-click community portal with a scheduled mail-sending service
<http://www.wowmail.de/>
- Browsable and searchable business information interchange database, where companies can enter basic information about themselves, their offer and contact information
<http://www.comexworld.com/>
- Students' personal ads system on a non-commercial site
<http://www.infostud.com/>

Education

1996 - 2001

The University of Belgrade, Information Systems department of the School of Organizational Sciences, undergraduate studies, near graduation

1992 - 1996

Grammar school, Kruševac

Skills

Computing:

- Programming languages: **C#, PHP, C, C++, Pascal, Perl, Modula 2**
- Environments: Microsoft Visual Studio .NET, Borland Delphi, Pascal and C++, JP Top Speed
- Thorough knowledge of **DHTML, CSS and JScript, XML and XSLT**
- Experience in relational database design, implementation and maintenance using **Microsoft SQL** and **MySQL** servers.
- Working with **SourceSafe** and **CVS** source control tools.
- Experience in DOS, Windows and Linux operating systems. Having considerable Linux and Windows administration knowledge.

General:

- Fast learner and adoptive to new technologies and environments. Communicative and good co-worker. Young and ambitious.
- Spoken languages: **Serbian**, native speaker, **English**, very good speaking and writing, **Russian**, studied for 4 years, understanding.
- Avid musician, plays guitar and piano since childhood.
- Owns a driver's license.
